

Electronic Test Technician

Department: Manufacturing
Location: Champaign, Illinois
Commitment: Full-Time

Cobalt Digital Inc. is an award-winning video conversion manufacturing company seeking a full-time electronic test technician. In this role you'll test and process Cobalt Digital products before they are shipped to customers. This position reports to the Director of Manufacturing. Cobalt Digital offers group health insurance, a 401(k) with matching contributions, and a generous company holiday schedule.

A typical day in Cobalt's test department will include processing untested products as they arrive from our factories. The work is in a fast paced environment and shifting priorities can be expected depending on customer, engineering, and sales requirements.

Skills you will need to be successful:

- Experience reading and interpreting test procedures, schematics and engineering drawings
- Familiarity with measurement tools such as oscilloscopes, multi-meters, and test signal generator monitors and analyzers
- Have an understanding of electronic circuit theory and design
- Ability to troubleshoot printed circuit board assemblies to the component level
- Soldering skills and ability to do precision work
- Strong attention to detail
- Communicate and describe unexpected issues to supervisors and/or engineering as they arise
- Knowledge of broadcast video is highly desirable
- Have fun in a challenging and rewarding environment

The above statements are a general description of work being performed. They are not intended to be an exhaustive list of all responsibilities, duties, and skills required.
