

9991-IP-TO-SDI-10GE • 3G/HD/SD-SDI SMPTE De-Encapsulator (2022-6 or 2110 Options) with AES / Analog Audio Embed / De-Embed and 10GigE IP Optical Interface

The Cobalt® **9991-IP-TO-SDI-10GE** 3G/HD/SD-SDI SMPTE De-Encapsulator (2022-6 or 2110 Options) with AES / Analog Audio Embed / De-Embed and 10GigE IP Optical Interface offers full-flexibility AES and analog audio embedding/de-embedding with the built-in versatility of both coaxial and fiber SDI inputs in a basic, economical, high-efficiency openGear® card. More than only a basic embedder/de-embedder, the 9991-IP-TO-SDI-10GE offers the flexibility of IP-to-SDI as well as providing fully flexible AES and analog audio embedding/de-embedding. When ordered, the 9991-IP-TO-SDI-10GE can be factory-fitted with either a SMPTE 2022-6 or 2110 IP de-encapsulator SFP module.

The 9991-IP-TO-SDI-10GE provides full 16-channel embed / de-embed between AES, 8-channel analog audio, and all four groups of embedded audio. Audio embed adaptive SRC allows asynchronous 48 kHz AES audio to automatically sync with program video 48 kHz timing for glitch-free embedding. Individual, per-pair SRC auto-detects and disables SRC when a Dolby pair is detected on an input pair. Analog embed/de-embed conforms with professional balanced audio at 0 dBFS to pro 24 dBu levels using full 24-bit conversion. Fully error-free pathological pattern operation is fully compatible with professional fiber video interfaces. Full audio crosspoint allows per-channel

gain and routing controls, as well as built-in tone generators. The 10GigE host connection can be used directly with 10GigE video switches and routers.

Preset save/load allows saving custom card settings while allowing one-button revert to factory settings. Full user Dashboard™ or Remote Control Panel remote control allows full status and control access locally or across a standard Ethernet network.

FEATURES

Orderable as SMPTE 2022-6 or 2110 compliant. 2022-6 model is ST 2022-6 (HBRMT), ST-424, ST-292, and ST-259 compliant.

16-channel AES support and 8-channel analog audio support in one card. Individual per-pair embedding or de-embedding. Provides four-group SDI embed/de-embed and cross-conversions between analog and AES discrete audio.

DashBoard™ status display, audio meters, tone generators. GUI audio meters provide ready assessment of content presence and line-up.

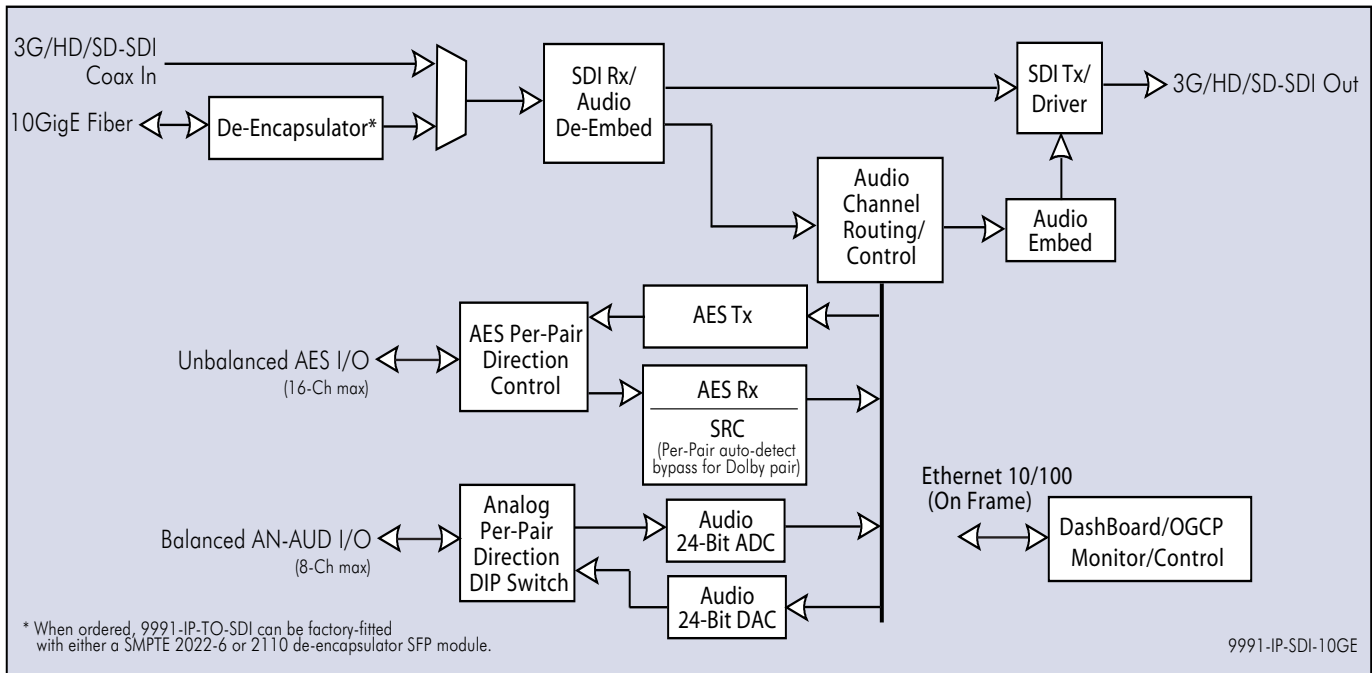

Audio embed adaptive SRC allows asynchronous 48 kHz AES audio to automatically sync with video 48 kHz timing for glitch-free embedding. Individual, per-pair SRC auto-detects and disables SRC when a Dolby pair is detected on an input pair.

Low-power/high-density design – less than 18 Watts per card

Option +DT User COM Data Insert/Extract Software Option allows serial data insert/extract over SDI (User DID/SDID access)

Remote control/monitoring via Dashboard™ software or OGCP-9000 remote control panels

Five year warranty
