## Engineering Release Notes

You can update your card by downloading the new Update software by going to the **Support>Firmware** link at [www.cobaltdigital.com](http://www.cobaltdigital.com). Download "Firmware Update Guide", which provides simple instructions for downloading the latest firmware for your card onto your computer, and then downloading it to your card through DashBoard™.

**Software updates are field-installed without any need to remove the card from its frame.**

The table below lists released software versions and describes the corresponding functions additions, improvements and/or corrections.

Software Version	Description
9001 – Release 214 9002 – Release 215 (11/6/2013 – present)	<b>Corrections:</b> <ul style="list-style-type: none"><li>• Allows DashBoard™ DataSafe function to save and restore card configuration settings.</li><li>• Fixes erroneous persistent "upgrade in progress" DashBoard message sometimes following a card firmware upgrade.</li></ul>
9001 – Release 191 9002 – Release 193 5/4/2012 – 11/6/2013)	<b>Corrections:</b> <ul style="list-style-type: none"><li>• Allows DashBoard version 4.1 to work with card (earlier card versions would not properly display card controls when accessed using DashBoard version 4.1).</li></ul> <b>Note:</b> DashBoard interface issues never affect card processing functions. The issue corrected here is limited to DashBoard remote control only; card signal processing remains unaffected. Regardless of error message displayed, the card can receive the updated firmware in the release using the card <b>Upload</b> button in DashBoard.
